Tim Phalen Lecture Sessions:

PRE-REGISTRATION IS REQUIRED.

STEMI Tune-Up

4:00pm -5:00pm

Seminar Rooms A/B

We've been interpreting 12-leads for many years but are we doing it correctly and consistently? Learn some tips and tricks to improve recognition of ST elevation and real-world strategies to dramatically reduce ECG artifact.

Obstructive Myocardial Infarctions (OMI)

5:00pm-6:00pm

Seminar Rooms A/B

There are patients that have critical obstructions (clot) that would benefit from immediate cath lab activation but do NOT have ST elevation. Learn how to move beyond ST elevation and identify other ECG changes indicating appropriate cath lab activation.

Real-World Capnography Applications

6:00pm- 7:00pm

Seminar Rooms A/B

This session explores the many uses of capnography. Starting with a review of the essentials and physiology of capnography then moving into real-world applications. Emphasis is placed on how to utilize capnography for critical decision-making in a variety of settings.

About the Presenter:

Tim Phalen has provided over 2,500 ECG workshops to well over 100,000 healthcare providers in more than a dozen countries. He has authored four ECG textbooks and presented at scores of conferences including EMS Today, EMS World, ENA, and NTI.

Interactive Workshop Sessions:

PRE-REGISTRATION IS REQUIRED.

Trauma Skills Reimagined

Time: 1:00pm - 2:00pm

Room: Room D

Presenter: Mel Maurice, NRP, CIC

Summary: Come join this class to learn or refresh critical trauma skills. We will primarily cover severe hemorrhage control techniques such as tourniquet use, hemostatic gauze, and improvised bleeding control techniques and devices. This class is suitable for BLS and/or ALS.

Bringing Back The Dead

Time: 2:00pm-3:00pm, 5:00pm-6:00pm

Room: Room C

Presenter: Josh Kimbrell, NRP

Summary: In the Bringing Back the Dead station, you will be challenged to perform high-quality CPR with your team in a high-pressure environment. Do you have what it takes to lead a team through a successful resuscitation? Come find out! This class is suitable for BLS and/or ALS.

Airway: Beyond The Basics

Time: 3:00pm-4:00pm and 4:00pm-5:00pm

Room: Room D

Presenter: Michael Zelenetz, Jess Boyle

Summary: Take your airway management to the next level: EMTs and Paramedics alike are invited to this hands-on session to level up your airway management skills. Master the BVM, decontaminate the airway, manage facial hair, familiarize yourself with new airway adjuncts like iGels, improve your first pass success with video laryngoscopy, and learn the SALAD technique on a vomiting airway simulator! This class is suitable for BLS and/or ALS.
